

# Brightwell Recreation Ground

## Enhancing an existing play Area

Client: Byfield parish Council

Address: Brightwell Recreation Ground, Byfield, Daventry NN11 6UT

Budget: £30,000

Age Range: Toddler, Junior

### Project Story

Brightwell Recreation Ground is a very functional open space accommodating various sports including cricket, football, tennis and bowls. As the grounds were very popular, it was important that the area also provided suitable facilities for children. Byfield parish Council developed a brief which outlined a need for the new equipment to offer engaging and exciting play values while complimenting the existing equipment. Proludic provided a new design which included popular items such as the cableway, a challenging multiplay unit from the IXO range and family play panels such as tic tac toe.

After

Before

From start to finish the project was very well managed and directed. Responses to communication were very prompt and the overall experience was very positive. We now have some excellent additions to our children's play area.

### Play Spaces for The Whole Community

Playgrounds provide opportunities for local communities to come together at many different levels. They appeal to all ages, abilities and backgrounds, and they help both children and adults to meet and socialise. As well as many health benefits that make outdoor play great for children, creating play spaces for varying age groups also encourages families to be active and have fun together.
